SUMMARY

Data Scientist and AI Engineer who builds analytics and AI products adopted by the Board of Directors, Finance, and Sales. Delivered a data-grounded chatbot cutting time-to-insight from 25 hours to 3 minutes, and a dashboard platform used daily by 50+ managers. Skilled in Python, SQL, cloud data platforms, and end-to-end ML.

EDUCATION

Brawijaya University - GPA 3.95/4.0

Malang, Indonesia

Bachelor of Science in Informatics Engineering / Computer Science

2021- 2024

Universitas Surabaya

Surabaya, Indonesia

Master of Management

2026

WORK EXPERIENCE

AI Engineer (Project Based) at Vobis.io

Semarang

OCR, Large Language Model

January – March 2025

- Developed automated receipt and invoice recognition systems, achieving 92% accuracy on internal benchmarks through a hybrid approach combining native OCR and LLM-based document parsing, optimized for edge-device deployment.
- Developed an LLM-powered chatbot that delivers personalized responses using hybrid RAG-based retrieval, combining semantic and keyword search to ground responses in relevant user-specific information.

Data Analyst & Scientist at PT Lautan Natural Krimerindo

Mojokerto

Large Language Model, Computer Vision, Data Analytics

April 2025 – Present

- Applied machine learning, computer vision, large language models, and data analytics to develop data-driven solutions for operational and business problems.
- Led development of a data-grounded internal chatbot for self-service analytics, cutting time-to-insight from 25 hours to 3 minutes versus the manual request process.
- Developed OneAnalytics, an enterprise analytics and dashboarding platform used across the organization, including Board of Directors, Finance, Sales, and other directorates, enabling centralized access to business insights and data-driven decision-making.

SKILLS

Technical Skills: Python, Machine Learning, Deep Learning (Pytorch and Tensorflow), Computer Vision, Natural Language Processing, SQL, Scraping, Git, Weight & Biases, Docker, PySpark, Hadoop, AWS data stack, BigQuery, Metabase, and Java

Soft Skills: Problem Solving, Project Management, Communication, Teamwork.

Languages: Indonesian (Native), Conversational Proficiency in English (TOEFL: 577).

Specialization & Training: Deep learning AI Natural Language Processing in Tensorflow (Coursera), Architecting on AWS (Dicoding), Machine Learning Specialization (Coursera), AWS Data Engineering.

HIGHLIGHTED PROJECTS

OneAnalytics: Internal Dashboarding Tools

Data Analytics, BI

- Developed an internal analytics and dashboarding platform to centralize business metrics and facilitate data-driven decision-making.
- Built dashboards and analytical views to provide stakeholders with accessible and actionable business insights. Used daily by 50+ manager-level and above users for reporting and monitoring.

Automatic Dustiness Powder Quality Control

Computer Vision, Segmentation

- Developed an automated quality-control system that analyzes video footage of a powder to measure the resulting dust plume. Used by QC team to measure 100+ daily powder sample quality.
- Transformed the computer vision measurements into a new quantitative quality-control standard, providing a more objective approach to powder dustiness evaluation.

Anak Baik: Ethical Indonesian LLM

Language Modeling, Dataset Creation

- Curated an Indonesian instruction-following dataset for ethical risk mitigation
- Trained and evaluate an ethical Indonesian LLM
- Conducted [research](#) on ethical considerations in Indonesian language modeling.

Other personal projects

ACHIEVEMENT

1st Place Quality Control Circle (QCC) - Lautan Luas Tbk. and PT Lautan Natural Krimerindo

Continuous Improvement, Data Engineering

- Improved reliability of a critical data pipeline processing ~27K executions per week, eliminating recurring SLA breaches and delays of up to 6 hours.
- Achieved 100% SLA compliance through improvements in pipeline monitoring, error handling, and operational processes.
- Successfully achieved 1st Place at the company level, before advancing and winning 1st Place at the Lautan Luas Group level.
